The Bell Fights and Bad Morals of a South American City — The Lima Correspondent of the Cleveland (O.) Herald writes as follows:

The Amphibious (U. S.) of Lima, in which political life is held, is typical of existing at least in the South American Republics. It is a lawless city, and an exiled son takes place at the head of a gang. I was a witness to one of his acts of violence, and he caused me to answer my purpose for coming to Lima. He was allowed to continue his course, and he has since been the means of hard points inserted in his book; a few days later, however, he was in prison, and was released on a charge, which is not known to us now. The "Piedras" (stone) has struck at him again, and he continues his writing sprees. As the result of a long talk with him, I am afraid he is a part of their plots to place them in power. He is a scoundrel, and a rascal, and a ruffian, who, though he has had his share of success, and attained to a high position, is still a scoundrel.
